

Security HC Meeting

July 20th, 2023

Agenda

- Security model
 - Each chapter is now a separate google doc
 - Please volunteer to edit, add content etc to Paul Elliot or the security model list
- CC implications of debug
 - To be further discussed in the APTEE (there was some work done already), and will invite debug to present at the security HC for a wider discussion
- Presentation – invited talk
 - Interesting talk. Presentation to be posted separately.
 - Some debate as to costs vs CHERI as presented, but agreed it was a smaller simpler subset so was likely cheaper with a different target.
 - Continue discussion on the Runtime integrity SIG
